- ▣ Over 300 professional audio/video installations
- ▣ Live sound run for up to 10,000 attendees indoors and outdoors
- ▣ Aggie Owned and Operated
- ▣ HUB Certified

Service and Maintenance

Protect your audio and visual investments with routine maintenance and on-call assistance from expert sound technicians.

3602 E. 29th Street, Bryan, TX 77802

Can you hear me now?

Just how valuable is your message? The quality of a presentation, conference, or speech is only as good as the media used to project it.

Equip your venue with superior lighting and audio solutions and your message will spread, but several months after installation you hear a high pitched squeal during a presentation, the new sound technician isn't quite sure how to operate the equipment, plus your projector is blurry. Now what?

Enter RDM Audio Services and Maintenance contracts. With affordable and customized maintenance plans the sound guys at RDM Audio will deliver top-notch tune up service. Take advantage of preventative and on-call service by letting experienced engineers:

- 🔍 Recalibrate sound systems (including adjusting frequencies) two to four times per a year
- 🔍 Testing the main speakers, monitors, soundboard, microphones (wired and wireless), and snake
- 🔍 Assessment of stage lighting and projectors (at ground level)
- 🔍 Provide a written assessment
- 🔍 Additional on-call service available
